

Euro-GOODNIGHT

textiles for a sustainable future

**“Visit us in
WTCE 2018 –
Booth #4D70”**

Proyecto cofinanciado por los Fondos FEDER, dentro del Programa Operativo FEDER de la Comunidad Valenciana 2014 - 2020*

SPONSOR SPOTLIGHT / 23

Euro-GOODNIGHT is a reliable partner with great textile heritage and generational transmission of know-how since 1800, specializing in the production of quality inflight products.

We are vertically integrated from spinning to confection, producing all types of jacquard woven blankets for airline, home, institutional and military use. We are also producing a full range of fleece, washable and disposable blankets, rotatable and disposable table linen, pillows and pillowcases, headrests, duvets and comforters from cotton sateen to polyester peach skin, with fibre and down fillings that provide comfort and warmth.

CONTINUOUS RESEARCH AND PRODUCT IMPROVEMENT

As the supplier for major airlines and extremely demanding institutions like the military and fire brigades, we have been able to demonstrate our mastering of both physical and chemical properties in our textile processes, i.e. permanent antistatic, bacteriostatic and anti-bacterial, air permeability and thermal insulation.

Our improved thermal properties to weight ratios help maintain body temperature at altitude, while supporting airline's needs for reduced stowage space and fuel consumption. Our blankets make the

travelling experience more comfortable. Made from either man-made or natural raw materials, they are soft, skin friendly and anti-allergic.

SUSTAINABILITY

EURO-GOODNIGHT has placed sustainability at the centre of its business through research and technology implementation, with the aim of achieving a green future for the textile industry. We have ISO 9001: 2015 quality certification and ISO 14001: 2015 environmental management system and have also signed the UN Global Compact. We are actively addressing the issue of sustainability and driving fundamental changes in the production of our textiles while still improving product quality and competitiveness.

The origin of all the electricity we consume is certified 100% renewable and a substantial part of our net income has been invested in renewable energy installations.

NEW PRODUCTS

We have added and will be presenting at WTCE 2018 a number of interesting new products to our collection, such as new textile anti-slip tray mats, microfibre blend cold and hot towels and disposable and short-life cotton napkins.
